

- 1. Removes Solids + Water + Sludge!**
- 2. The ultimate mobile Oil Cleaner**
- 3. Perform Oil Cleaning while you check the oil contamination (with optional i-OC)**

3-in-1 Oil Cleaning for service and maintenance!

Features:

- Compact mobile bypass oil cleaner.
- Ideal maintenance Oil Cleaner in combination with our i-OC Monitoring systems.
- Low running cost, easy installation & manipulation.
- Also available with 4 housings or with SS and SU filter housings, for bigger flow rates.
- Performs **3-in1 Oil Filtration** = removing all the particles that are very difficult to remove with full flow filters, and performing absolute Oil Cleaning by removing **solid particles**, absorbing **water** and eliminating **sludge** and **oil oxidation residues**.

Environmental protection:

- Triple R filters effectively clean the oil (down to NAS 6 or ISO 15/12) and stabilize the oil condition.
- That results in a significant increase of oil life and a significant reduction of oil consumption and oil disposal cost.

Benefits:

- Improves productivity and machine reliability.
- Prevents breakdowns to the hydraulic equipments.
- Longer life of all hydraulic components, pumps, servo-valves and other equipment.
- Very important reduction of the oil consumption cost and the resulting waste oil expenses.
- Discharges the very expensive full flow filters and extends their life (50% - 80% cost saving!).
- Significant reduction of maintenance expenditures.

Typical applications:

- **Perfect for oil cleaning during Service interventions and Maintenance activities.**
- All hydraulic systems fitted with dirt-sensitive pumps, proportional valves and servo-valves.
- Also available for Diesel fuel, high viscosity oil or water glycol fluids.
